

Carbon Reduction Plan

Supplier name: Fine Care 247 Ltd

Publication date: 17/07/2024

Commitment to achieving Net Zero

Fine Care 247 Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Emissions reduction targets

We have had no previous emissions reduction commitments.

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 155.15 tCO₂e by 2027. This is a reduction of 76.75% and projection is to reach net zero carbon by 2050. It is envisaged that the carbon offsetting or technology such as carbon capture and storage will be deployed to achieve the difference between actual and net zero carbon.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2022/23 baseline.

Carbon Reduction Projects includes the following:

- Reduction of energy used by office equipment's

- Installation of energy effective lighting in the office premises.

- Enabling energy saving measures for office equipment's such as setting computers And monitors to automatically turn off when it is idle for more than 15 minutes.

- Creating awareness among employees about energy efficiency

- Using Electric Vehicles for commuting.

- Printing mode is set to energy efficient mode.

- Reduction of paper sources by using double side printing, Black and white ink .
